Perfume #IDS 9152

PH: 7.5 - 8.0

Specific gravity: 1.02 - 1.05

Soluble in water

**PACKAGING**

100gm tube, 400gm polyethylene tub,  
2kg tin.

**FIRE - EXPLOSION**

Non flammable, will not produce vapours or fumes.

---

**HEALTH HAZARD**

---

**ACUTE HEALTH EFFECTS**

**SWALLOWED:**

Considered and unlikely route of entry in Commercial/Industrial environments. The material is regarded as practically non-toxic

if swallowed, but may be discomforting and harmful if swallowed in quantity. Ingestion may result in nausea, abdominal irritation, pain and vomiting.

**EYE:** The liquid may produce eye discomfort causing smarting, pain and redness and is capable of causing temporary impaired vision.

**SKIN:** The material is normally non-irritating to the skin.

**INHALED:** Not normally a hazard due to non-volatile nature of product.

**CHRONIC HEALTH EFFECTS** Primary route of exposure is usually by skin contact with the material. Indicators are that short-term exposure to the material by all routes is not harmful.

### **FIRST AID TREATMENT**

**Skin Contact:** Low hazard. Not normally a risk due to non-irritating nature of product. **If unintended contact occurs remove contaminated clothing and wash skin thoroughly.**

**Eye Contact:** Mild irritant; Immediately hold the eye open and wash with fresh running water. Ensure irrigation under the eyelids by occasionally lifting the upper and lower lids. If pain persists or re-occurs seek medical attention.

**Inhalation:** Low Hazard. **If fumes or combustion products are inhaled, remove patient to fresh air, lay them down and keep them warm and rested.**

**Ingestion:** **May upset stomach if ingested in large quantities.** Drink milk or water to dilute stomach contents. If irritation or discomfort persists seek Medical advice.

**Handling:** No special precautions.

### **ADVICE TO DOCTOR** **TOXICITY AND IRRITATION**

**Treat symptomatically**  
**Not available. Refer to individual constituents.**
